

# FLOOR & OPEN SPACES

**SUN & WEATHER PROTECTION**

FLOOR SYSTEM | MOBILE AWNINGS

A bright sun is shining through a wooden pergola structure, creating a starburst effect. The sun is positioned in the center of the frame, with rays of light radiating outwards. The pergola's wooden beams are visible, and the background is a clear blue sky with scattered white clouds. The overall scene is bright and sunny, suggesting a warm, pleasant day.

**INNOVATIVE SUN  
AND WEATHER PROTECTION  
SINCE 1964**

#### **FOUNDED IN 1964**

What started 50 years ago with considerable courage in an old cider cellar has today become a leading, global manufacturer of sun and weather protection solutions with production facilities in Switzerland.

#### **QUALITY & SAFETY**

The Gremaud family guarantees you durable, tailored products in uncompromising quality. We achieve this through the consistent use of high-quality materials, modern and environmentally sustainable production processes as well as continuous safety inspections.

#### **FUNCTIONALITY & TECHNOLOGY**

Our many years of experience and close cooperation with specialists, architects, planners and dealers enable us to develop innovative products that meet the highest demands. – Yesterday, today and tomorrow.

#### **AESTHETICS & DESIGN**

Emotions turn our daily routine into an adventure. The influence of colours and forms play a central role in this. Therefore, STOBAG awnings are customised for you.

# FLOOR & OPEN SPACES

Need a cool, shady spot in the middle of your garden?  
Not a problem with STOBAG's free-standing awnings.

## THE INCREDIBLE FLOOR SYSTEM

The floor system from STOBAG is exceptional. It is not made from wood, but from robust weather-resistant aluminium deck boards. The self-supporting aluminium floor construction can be quickly laid on various substrates. The clever aluminium hollow profile system, which acts as a cooling element, hardly warms up in summer.

Stand-alone or expanded by a sun/weather protection as an extension module, (I.S.L.A. Concept) permits unlimited individuality with the choice of colours, dimensions, locations and equipment. **See page 6**

**5 YEARS**  
**STOBAG QUALITY WARRANTY**  
REGISTRATION REQUIRED

## THE INDEPENDENT MOBILE AWNINGS

One of the main advantages of freestanding shading is the ability to use it in a wide range of locations. Whether it's in your own garden, in playgrounds or a convivial outdoor restaurant – the freestanding shading system provides a large number of possibilities for effective sun protection in domestic or commercial

environments. The use of the reliable STOBAG jointed arm technology allows an area of over 40 m<sup>2</sup> per system to be shaded. A range of support options and fixing systems ensure a secure hold. **See page 10**

# FLOOR SYSTEM SB4700

In the middle of the lawn, in the piazza in front of the restaurant or near the beach, it doesn't matter, wherever the floor system is it makes an irresistible, strong impact everywhere. The sophisticated self-supporting design made of top-quality aluminium can be quickly installed on the most wide-ranging types of surfaces. The modular frame system guarantees high stability and is completely rain-proof thanks to the clever drainage system. In addition, the multi-functional profiles provide hollow spaces accessible for cabling at all times. The STOBAG aluminium floor system is not just extremely functional and highly versatile, but is also outstanding due to its robust, long-lasting construction. The solid, powder-coated aluminium profiles and each individual connection components were designed for the highest load-bearing capacity. This ensures that the floor system is a firm base outdoors for many years to come. Whether individually as lifestyle terrace deck or in an extended layout as a complete solution with a STOBAG sun / weather protection extension module (I.S.L.A. Concept): Using the aluminium floor system, design your own outdoor area which will entice you to daydream and enjoy.

## DURABLE ALUMINIUM DECK BOARDS

Thanks to the aluminium deck boards, the floor hardly warms up at all. The surface heat is dissipated laterally through the aluminium hollow profile. The powder-coated aluminium deck boards are weather-resistant, deformation-resistant and extremely colour-fast.

## WOOD LOOK

The individual aluminium deck boards, which look incredibly like genuine deck boards, are low maintenance in comparison to wood. No planing or sanding required and there are no splinters.

**DIVERSITY OF COLOURS**

The frame of the SB4700 can be individually powder coated. With this option, hundreds of RAL and NCS colours are available.

**MULTI-GROUND**

Highly versatile on various substrates thanks to the range of supports. The low-maintenance, self-supporting construction is quickly ready for use since no complex foundation is required. Moreover, the individual deck boards are quickly laid thanks to the clever click system.

**SUPPORTS**

Few supports – quickly ready for use: The design requires, for example, only four supports for dimensions of 350 x 350 cm (no time-consuming substructure required).

**FLEXIBILITY**

The surrounding grooved channels allow the optimum positioning of the different I.S.L.A. extension modules.

# INDIVIDUAL STOBAG LIVING AMBIANCE I.S.L.A. Concept

The modular I.S.L.A. Concept is the overall solution from a single source. It is based on the robust aluminium floor system. Various sun/weather protection from the STOBAG range can be added on – a floor system can also be expanded by an extension module retrospectively.

Additional options are on offer, depending on the extension module: The wind-resistant vertical awnings ensure additional privacy and glare protection and the variable sliding glazing hold off wind and rain. In the evening, the low-energy LED lighting conjures up an atmospheric ambience wherever the mood takes you.

# MOBILE AWNINGS OMBRAMOBIL | BOXMOBIL

The free-standing double awnings, which create large areas of shade, are ideally suited for seating areas. As no disruptive middle posts are required, the space below this awning can be used to the best effect.

The stable folding arms roll out both sides synchronously or individually, depending on the model. Stability is ensured either by a concrete base, cross feet or floor sleeves to be set in concrete. The fabric and folding arms are securely stowed below the protective roof or in the protective box. So the free-standing shading can be left outside, even during the winter months.

STOBAG shading systems are individually manufactured and offer a huge range of possibilities. Continual quality control and the use of tried and tested brand fabrics with up to 100% UV protection guarantee maximum safety and functionality. Both models can be operated either by a convenient motor drive or a crank.

## FIXING VARIANTS

High stability with especially large shaded areas is guaranteed by the concrete foundation or by fixing with recessed floor sleeves.

### TRANSVERSE FOOT

OMBRAMOBIL

### FLOOR SLEEVE

OMBRAMOBIL | BOXMOBIL

### CONCRETE SOCKET

BOXMOBIL

**DROP DOWN VALANCE**

On request, the drop down valance can be lowered to protect against low sun.

**BOXMOBIL**

**CAN BE EXTENDED INDIVIDUALLY**

Thanks to the two independent cassette awnings on a solid steel support construction, each shading side can be extended individually.

**BOXMOBIL**

**SQUARE OR ROUND DESIGN**

Fabric and mechanism are perfectly protected in a square or round box when the awning is rolled up.

**BOXMOBIL**

**TOP BOARD**

Weather-resistant in all seasons thanks to the integrated protective roof and an optional cover hood.

**OMBRAMOBIL**

**LIGHTING**

Light for cosy evenings – available as a halogen light bar or as an LED.

**BOXMOBIL**

# AWNING ACCESSORIES & OPTIONS

More individuality and convenience with additional options.

## INSPIRATION & HARMONY

### FRAME COLOURS

STOBAG profiles and frame components are powder-coated to ensure you can enjoy your sun and weather protection systems in the years ahead as much as on the day they arrived. This environmentally-friendly process offers effective protection for the structure against environmental and weather factors. The maximum possible degree of colour uniformity in an endless array is guaranteed by the highest quality standards.

16 Classic, 12 Trend and hundreds of Rainbow colours (RAL and NCS) offers a choice to fulfil every wish.

## COLOURS & EMOTIONS

### COVER DESIGNS

By choosing a fabric from the STOBAG Collection from European quality weaving mills, you have opted for a top quality high-tech textile product. Let yourself be inspired and enticed by our extensive colour range and the special characteristics of our UV tested acrylic fabrics.

#### CLASSIC | UNI | BLOCK | FANTASY

Classically commendable. Our fabrics in the area of shade solutions offer the highest level of UV protection thanks to their premium-quality coating and excellent colour fastness. STOBAG Plus: Our acrylic threads for awnings are dyed using a spinning nozzle, meaning that the colours last longer, even with everyday use. The high-quality fabrics come exclusively from European weaving mills and meet the most rigorous quality standards.

#### BRILLIANT | UNI | BLOCK | FANTASY

Blindingly brilliant. The high-tech Lumera CBA fibres in the Brilliant range have been even more closely weaved together and thanks to a flatter surface instantly offer more benefits. Compared to conventional Classic acrylic fabrics, the fabrics from our Brilliant range are proven to be particularly dirt and water resistant. STOBAG Plus: Bright and intensive colours bringing you a unique brilliance.

## COMFORT & AMBIENCE

### AUTOMATIONS AND CONTROLS

We offer you exactly the comfort that you want from your individual awning system, from simple wind sensors to complex centralised air conditioning. Whether you extend an awning via remote control, turn on atmospheric lighting or want to control the façade and conservatory shading by smartphone: Our reliable automatic systems master any situation.

The actually trend leads to modern are finely structured colours.

Brilliant high-tech fabrics for more «joy of colour».
